Workwear

Introduction

Workwear

We have a wide selection of fabrics suitable for most industries. These extensively tested and durable fabrics offer outstanding breathability to provide the wearer with ease of movement and comfort, allowing them to complete their jobs safely and to the best of their ability. Our Company are found in Karachi Exprt Processing Zone, Pakistan and have been protecting Worlwide workers for more than 20 years. Browse through our fabrics and ensure that you are taking safety and that of your employees seriously.

A fabric made up of a 100% cotton twill weave and weighing 300gsm, the cotton fabric is tough and durable and ensures 100% breathability. It ensures breathability and is comfortable to wear making it an ideal workwear fabric. It is EN ISO 11611:2015 certified.

EN 11611

An EN approved fabric made up of 100% cotton twill weave and weighing 300 gsm. This is our ultra-cool flame retardant fabric which is used in sub-tropical areas. This fabric was initially developed for European companies working in the OGP industry, but since then it has found many other uses. It is EN ISO 11612:2015 approved.

EN 11612

This is a unique flame retardant, NFPA 2112 UL Certified fabric with APTV: 12.0 Cal rating. It is comfortable, durable and flexible, and provides all the protection required.

Approved Permanent Flame Retardant fabric made up of a 100% cotton Twill weave, weighing 270 gsm - 300 gsm. Being a 100% cotton, the fabric ensures breathability and comfort. This fabric can withstand a minimum of 100 washes washed according to approved manufacturers recommendations. In addition, it is when treated with chemicals giving it flame retardant properties. It is important to note that ironing this fabric after washing reignites the flame retardant properties. It is also a NFPA 70E approved.

Visibility is always a priority thus we offer reflective tape on most of our garments. This Fire Retardant Reflective tape is EN ISO 471 approved

A pen is an essential part of many workers' daily lives. Most of our garments are fitted with a pen division for this exact reason, allowing workers to easily access and store their pen as they go about their day.

A bar tack is a series of close, zigzag stitches used to reinforce areas of stress on garments, such as pocket openings, bottom of a fly opening or button holes. This quality feature adds extra durability to our garments.

Our triple stitched seams are fed through a folder by highly skilled and specialised machinists. On most of our garments we use triple stitching on all stress bearing seams to ensure our garments have an added life span.

We use YKK zips, the world's largest zip manufacturer, on most of our garments.

An adjustable cuff is an optional feature for extra comfort which allows the cuff to be adjusted to the individual wearer's size.

Visibility is always a priority thus we offer reflective tape on most of our garments.

The edges of the button holes are covered with a knot to "gimp" the buttonholes which gives garments superior strength.

We use double stitched seams on our garment pockets to ensure the garment is durable and has an extended life span.

We have a range of garments which have added knee padding to keep the wearer safe in rocking environments.

Permanent FR Jacket & Trouser 100% COTTON, 300 GSM

Features

- Buttoned front opening of Jacket
- Buttoned cuffs.
- Elasticized waist
- 2 part Brass Buttons
- Pockets

TROUSERS

TIGER TROUSER

Tiger Working Trousers with Holster Pockets

Code: **JN 101**

Fabric: **Heavy Canvas**

Colour: **Black** with Gray Contrast

Size:

Waist: 30" to 42"

Leg: Short (29"), Regular (31"), Tall (33")

Features

- Triple Stitched on all main seams for ultimate strength
- Multiple Pockets, including two side and two rear pockets
- Holster pockets with tool loops
- Knee Guard system to keep you knee pad in place
- Hi-Vis Reflective piping
- Heavy duty non-scratch fixing stud on waistband
- Functional D-Ring & Tool Holders
- Easy knee pad insertion & removal
- YKK Zip Fly

RABBIT TROUSER

Rabbit Working Trousers with Holster Pockets

Code: **JN 102**

Fabric: **Heavy Canvas**

Colour: **Gray** with Black Contrast

Size:

Waist: 30" to 42"

Leg: Short (29"), Regular (31"), Tall (33")

Features

- Contemporary design with an ergonomic cut
- Durable soft polycotton canvas for high performance and maximum wearer comfort
- Adjustable hem to accommodate all leg lengths
- Innovative design and making provides excellent comfort and flexibility
- Triple-stitched seams for extra durability
- Multiple pockets for ample storage
- Crotch gusset to reduce stress and prevent seam failure
- Two tier knee pad pockets allowing two positioning options
- Free pair of kneepads included with this trouser
- YKK Zip Fly

DEER TROUSER

Deer Working Trousers with Holster Pockets

Code: **JN 103**

Fabric: **Heavy Canvas**

Colour: **Black**

Size:

Waist: 30" to 42"

Leg: Short (29"), Regular (31"), Tall (33")

Features

- Durable fabric for high performance and maximum wearer comfort
- Adjustable hem to accommodate all leg lengths
- Reinforced panels in high wear areas for maximum durability
- Triple-stitched seams for extra durability
- Hi-Vis Reflective piping
- Multiple pockets for ample storage Double rule pocket
- Top-loading knee pad pockets for quick and easy access
- Two back patch pockets
- Hammer loop for secure storage of work tools
- D-ring for keys or ID cards
- YKK Zip Fly

- Pockets, Practical for screws and nail, can be placed into the wide
- Italian pockets.
- Side panel design for superior weight distribution
- Knee Guard system to keep your knee pad in place
- Unique sewn in centre crease-causes no wearer discomfort
- Heavy duty non-scratch fixing stud on waistband
- YKK Zip Fly

Hand Protection

Introduction

Hand Protection

Through our premium manufacturing, American Safety PPE offers a comprehensive portfolio of hand protection, suitable for your every need. Combining comfort, protection and ergonomics for user safety, our range of gloves is suited for all uses in any environment. Our aim is to guarantee comfort, safety and suitability - at an affordable price.

Define the application environment. Identify the general conditions of the workplace.

Will activities be carried out in wet / oily, damp or dry working conditions? All our safety gloves come with one of these 3 environment classification recommendations. The degree of suitability is determined by the respective amplitude level.

- Working areas that do not have any moisture (water, oil, fat, cooling lubricant, etc.). Safety gloves for these conditions are extremely breathable. Examples: quality control, assembly work, distribution, end processing.
- Working areas with some moisture. Safety gloves for these conditions are less breathable. The water/oil-repelling coating is crucial and guarantees slip-resistance. Examples: oil-coated parts, changing between dry and damp working environments.
- Working areas in which hands should be protected from liquids (not chemicals). Sealed safety gloves with high slip-resistance are necessary. Examples: removing oily/wet parts from machines, outdoor activities (weather-related humidity).

Hand Protection – Standards & Legislations

Protective Gloves: General Requirements

EN 420 2003 + A1: 2009

This standard defines the general requirements for glove design and construction, innocuousness, cleaning instructions, electrostatic properties, sizing, dexterity, water vapour transmission and absorption along with marking and information.

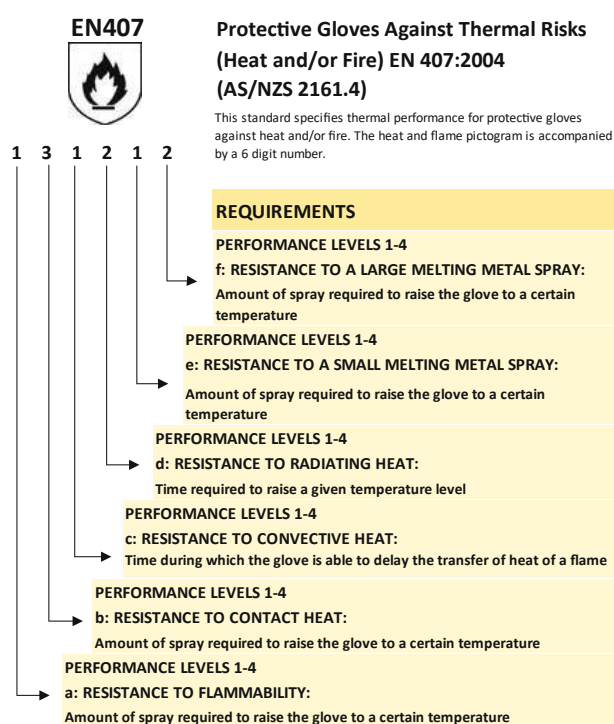

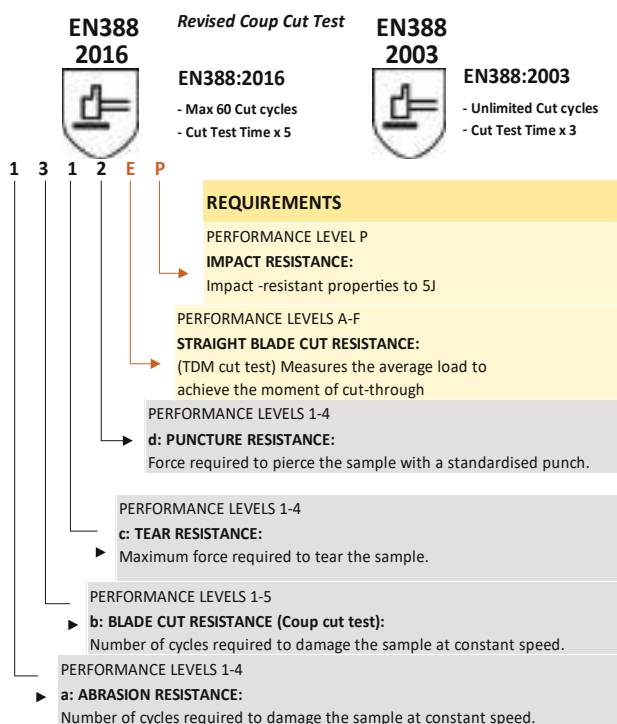

PROTECTIVE GLOVES AGAINST MECHANICAL RISKS

EN388:2016 EN388:2003

Standard specifies physical & mechanical aggression caused by abrasion, blade cut, tearing & puncture. EN388:2016 updates the existing standard with this new test method for abrasion, blade cut & impact resistance. EN ISO 13997:1999 (TDM test) records cut results as a Newton value-the force of the blade on the glove material needed to cut through the material 20mm.

EN Impact Protection

Based on the measured transmission of energy and force when the sample experienced a dropped load.
